

# VISUAL HISTORY OF THE HOLOCAUST

Rethinking Curation  
in the Digital Age

## Workshop Citavi

Vienna, Austria  
February 13 – 14, 2020

Hosted by

Ludwig Boltzmann Institute  
for Digital History, Vienna

At a very early stage of the VHH project, the decision was taken to use the Reference Management and Knowledge software Citavi as a preliminary tool to catalogue, collect, and annotate text documents. Since then the cloud-based VHH Citavi Database (the VHH Citavi Project) has been used for various purposes: collecting scholarly literature (the VHH Literature Database), collecting primary sources, organizing archival research, creating controlled vocabularies, extracting and annotating quotes from the text documents. With a large workgroup using Citavi, this 1.5-day workshop aims at implementing the Citavi workflows developed in the first year of the VHH project.
